Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Please amend claims 1, 6, and 13 as follows:

1. (currently amended): A system for automatically obtaining loss mitigation loan workout decisions, comprising:
  - a network of personal computers connected into a network administered by a central server computer,
  - each personal computer in the network including a network interface for transmitting borrower inputs to, and receiving outputs from, the server computer,
  - each personal computer in the network further including display screens for receiving inputs from, and providing outputs to, a financially troubled borrower, including inputs and outputs relating to a proposed loss mitigation loan workout,
  - the central server computer having a central processing unit that runs automatic workout decision analysis software, wherein the analysis software analyzes information relating to a preexisting loan whose terms are not being met by the financially troubled borrower and other information relating to why the troubled borrower is financially troubled to determine whether to automatically approve the proposed loss mitigation loan workout,
  - the central server computer transmitting to the financially troubled borrower, automatically over the network, automatic approval of the proposed loss mitigation loan workout

if certain predefined parameters are met and, if the predefined parameters are not met, providing further instructions to the financially troubled borrower.

2. (original): The system of claim 1, wherein the personal computers are connected into the network using an Internet connection.

3. (original): The system of claim 1, wherein the network interface is web-based.

4. (previously presented): The system of claim 1, wherein a user selects a loss mitigation loan workout type among a menu of predefined loss mitigation loan workout types.

5. (original): The system of claim 1, wherein if the user inputs fail to satisfy predetermined guidelines, the user receives a message informing the user that the system cannot be used.

6. (currently amended): A method for automatically obtaining loss mitigation loan workout decisions, comprising:

connecting a network of personal computers connected into a network administered by a central server computer;

providing each personal computer in the network with a network interface for transmitting borrower inputs to, and receiving outputs from, the server computer;

displaying on each personal computer in the network screens for receiving inputs from, and providing outputs to, a financially troubled borrower, including inputs and outputs relating to a proposed loss mitigation loan workout;

running automatic workout decision analysis software analyzes information relating to a preexisting loan whose terms are not being met by the financially troubled borrower and other

information relating to why the troubled borrower is financially troubled to determine whether to automatically approve the proposed loss mitigation loan workout;

transmitting to the financially troubled borrower, automatically over the network, automatic approval of the proposed loss mitigation loan workout if certain predefined parameters are acceptable to the financially troubled borrower.

7. (original): The method of claim 6, further including:

connecting the personal computers into the network using an Internet connection.

8. (original): The method of claim 6, further including:

using a web-based interface for connecting the server computer into the network.

9. (previously presented): The method of claim 6, further including:

system of claim 1, wherein a user selects a loss mitigation loan workout type among a menu of predefined loss mitigation loan workout types.

10. (original): The method of claim 6, further including:

transmitting a message informing the user that the system cannot be used if the user inputs fail to satisfy predetermined guidelines.

11. (previously presented): A computer-readable medium whose contents cause a computer system to automatically obtain loss mitigation loan workout decisions by performing the steps of:

accessing first information relating to a preexisting loan whose terms are not being met by a financially troubled borrower and second information relating to qualifications of the financially troubled borrower;

Appl. No. 09/788,132  
Amdt. dated September 6, 2005  
Reply to Office Action of June 7, 2005

analyzing said second information to determine whether the financially troubled borrower qualifies for a proposed loss mitigation loan workout;

analyzing said first and second information with respect to certain predefined guidelines for an acceptable loss mitigation loan workout; and

approving automatically the proposed loss mitigation loan workout if the proposed loss mitigation loan workout is within said certain predefined guidelines.

12. (previously presented): The computer-readable medium of claim 11, wherein the user selects a workout type among a menu of predefined loss mitigation loan workout types.

13. (currently amended): The computer-readable medium of claim [11]12, wherein a selected workout type is a Repay/Forbear workout type, a Borrower Assistance Program workout type, or a Loan Modification workout type.
